EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace Claim 2 as follows:

2. (Amended) A projector-type liquid crystal projector comprising a light source, a plurality of color separating means for separating light emitted by said light source into beams of blue, green and red colors; optical means including image forming liquid crystal crystal light valves and image synthesizing means for synthesizing images for the respective blue, green and red beams which are arranged in an optical path; and a projection lens,

a cooling [fans] fan being positioned in a plane [over] below a surface on which said image forming liquid crystal light valves are secured, said image forming liquid crystal light valves being operatively associated with said cooling [fans] fan by being positioned directly in the path of cooling air produced by said cooling [fans] fan [.] the cooling fan having a peripheral portion and a center portion, the peripheral portion of the cooling fan disposed directly below the image forming liquid crystal light valves for the blue and green beams, and the center portion of the cooling fan being disposed directly below the image forming liquid crystal light valve for the red beam.

Inventorship

2. In view of the papers filed 10/4/1999, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by deleting Keisuke Sakagami.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of Office records to reflect the inventorship as corrected.

Allowable Subject Matter

3. Claims 1-24 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest a projector housing chassis having a first and second wall, optical elements on the first wall being constrained against movement relative to the first wall and an outer chassis attached to at least one second wall or a projector having a cooling fan positioned in a plane below a surface on which LC panels are secured with the peripheral portion of the fan disposed directly below panels for green and blue light and a center portion directly below the panel for red or a projector having an exhaust fan arranged near one side surface of a lamp housing to cover one side of the lamp and exhaust air at a side surface of the lamp housing and a lamp fan

Art Unit: 2851

positioned further forward than an opening of a lamp reflector and laterally of the lamp housing.

The declarations make clear that applicant originally claimed less than they had a right to claim because the claims were unduly limited and claim 2 was inconsistent with the original disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Dowling whose telephone number is 571-272-2116. The examiner can normally be reached on MON-THURS.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on 571-272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
